LESSON 22: ENHARMONICS

1. By now many students have noticed that each of the black keys has two names: one set with sharps that is used when raising notes, and one set with flats that is used when lowering notes.
2. We have also learned that four of the white keys have two names:
 F can be called E-sharp, C can be called B-sharp,
 E can be called F-flat, B can be called C-flat.
3. When two notes have the same sound (because they are played by the same key on the piano) but have two different names, they are called **enharmonic notes**. C \sharp and D \flat are enharmonic notes.
4. On a band instrument, enharmonic notes will have the same fingering!
5. Here is a piano keyboard with all of the enharmonic notes listed.

6. There are nine pairs of enharmonic notes. Memorize these pairs shown in the chart below. Remember, enharmonic notes have the same fingering. If you don't know the fingering to a note, you probably will know the fingering for its enharmonic spelling!

Exercise 6.18 - Writing Enharmonics

Directions: Give the enharmonic spelling for each note below.
